

Could you tell your story with your data?

Do you collect data from/about your beneficiaries?

Do you use that data to tell your story?

Could we help with a data project?

Our teams of learning app developers can turn your impact data into stunning visualisations (even animated ones) that you can embed into your website or social media content.

We take your anonymised data and turn it into a visual element of your story.

We can work with you to find funding for the project, we can sometimes access educational funding for the project or we charge a small fee for the service. With us, you will be helping young people to learn new skills and to use those skills in a real world context, in a team and in a real working environment.

Take a look at this [interactive report](#) we made for The Restoration Trust, a Norfolk-based mental health charity.
